IS HIS OWN ATTORNEY.

Abraham Ruef Appear Thus In San Francisco Court.

SCHMITZ IS ALSO PRESENT

Chases of Patrick Calhoun and Several Others, Charged With Bribing Fourteen Members of the Board of Supervisors. Come Up Saturday.

San Francisco, May 28.—Abraham Ruef, the indicted ex-political boss of San Francisco, appeared as his own lawyer Monday is one of the many criminal proceedings pending against him. Seated in one of the crimson cushioned pews of the Jewish synagogue, that is Judge Lawyer's temporary court room, he looked desolate and forlorn.

Directly across the aisle, in another pew, sat Mayor Schmitz, Ruef's fellow-defendant on many charges.

Delphin M. Delmas, the San Francisco lawyer who attracted wide attention by his defense of Harry K. Thaw for the murder of Stanford White, has been retained to defend President Lewis Glass and Theo. V. Halsey, of the Pacific States Telephone and Telegraph company.

The first cash bail to be offered by any of the nineteen men thus far indicted by the grand jury was a \$70,000 certified check by Frank G. Drum, indicted on fourteen counts, charging the bribery of supervisors, in behalf of the San Francisco Gas and Electric company.

Monday was arraignment day for the millionaires and multi-millionaires. President Glass and Agent Halsey of the telephone company were arraigned before Judge Lawler on different indictments charging them with bribing supervisors to vote against the issuing of a competitive telephone franchise.

President Patrick Calhoun, Vice-President Thornwell Mullaly and Attorneys Ford and Abbott, of the United Railways were called for arraignment on indictments charging them with having bribed supervisors toward the trolley franchise under which the United Railways system is operated. They were given until Saturday morning to answer. Ruef and Schmitz were arraigned in indictments charging the same crime in connection with the supervisors and the United Railways. The same disposition was made. Bail in the sum of \$910,000 was given by six millionaires and Mayor Schmitz. Attorneys Sampbell and Farrell to get a reduction in the \$400,000 bail required of Mayor Schmitz, which they denounced as "excessive and violative of the constitution." Judge Coffey took the matter under advisement.

It may be stated by authority that the grand jury has in mind the returning of at least 100 more counts against men who have already been indicted. The statements of the prosecution is that in the several alleged bribes of the supervisory board by officers of public service corporations, even one of the eighteen supervisors and the mayor himself were corrupted. Thus far the grand jury has returned counts charging the bribery of only some of the supervisors and not of the mayor at all.

The cases of Patrick Calhoun of the United Railways, Thornwell Mullaly, his assistant, and Tiery L. Ford and William Abbott of counsel for that corporation, charged with bribing fourteen members of the board of supervisors, were continued until next Saturday morning.

DOMITORY DESTROYED.

Girl Inmates of the Institution Lost All of Their Belongings.

Guadalajara, Mex., May 28.—Fire broke out in the rear of the dormitory of the Instituto Colon, a female mission school of the Methodist Episcopal church, South. No lives were lost, but all clothing and belongings of the girl inmates were totally destroyed. The school was thrown into a panic as the fire occurred during class hours. The teachers, however, maintained discipline and succeeded in getting all of the students out of the building, which was practically destroyed. It is impossible to estimate the financial loss.

Laid to Rest.

Liverpool, May 28.—An immense crowd attended the funeral Monday of the Rev. Dr. John Watson, "Ian MacLaren," who died at Mount Pleasant, Ia., May 6. There was an impressive service at the Sefton Park Presbyterian church, where the embalmbed body had rested since its arrival here, May 21 from the United States.

Old River Captain Dies.

Cincinnati, May 28.—Captain John Morledge, well known as a steamboat captain died after sixty years active services on the river. During the civil war he served with distinction under Commodore Foote, taking part in many of the river fights about Vicksburg.

Inventor Passes Away.

Los Angeles, May 28.—Francis Ludlow Clark, a well known inventor, chief engineer of the Westinghouse Air Brake company and designer of the Westinghouse brake, died here of paralysis.

FOURTH COUNT MADE.

In the Fountain-Edge Dry Goods Co.-James Contest—Some Changes in the Standing of the Candidates.

The fourth count in the Fountain-Edge Dry Goods Co.-James scholarship contest was made last night and shows continued interest in the contest and some changes in the standing of the candidates. There is yet however, no indication of who the winners will be, because of the long time until the contest ends. This week Marion Franklin leads the list, with Rev. G. A. Foster second and Dan Sullock third among the men. Miss Lena Searcy has the second largest vote in the list, with Miss Lula Bullock second and Miss Lula Umensetter third among the young ladies.

Patrons who do not receive their votes with goods sent out are requested to notify the store.

BRAZOS UNION LODGE OFFICERS.

At a regular meeting of Brazos Union Lodge No. 129, A. F. and A. M., held Monday night the following officers were elected for the ensuing year: W. F. Gibbs, Worshipful Master; Ralph B. Dunn, Senior Warden; O. E. Saunders, Junior Warden; Dr. Paul M. Raysor, Secretary; Robt. W. Howell, Treasurer; Thos. Rowan, Tiler.

Worshipful Master Gibbs has announced the following additional officers by appointment: M. H. James, Senior Deacon; Joseph Gelber, Junior Deacon; Joe B. Reed and Jas. J. Ray, Stewards.

The lodge will hold a called meeting Thursday night for work in the Master's degree with three candidates.

T. W. C. COMMENCEMENT.

The graduating exercises of the Texas Woman's College will be held at the opera house this morning from 10:30 a. m. to 12, and Hon. T. P. Buffington of Anderson will deliver an address.

The annual reception will take place tonight at the Texas Woman's College from 9 to 12.

The Graduate Musical Recital, announced for last night, was postponed indefinitely on account of the weather. The Class Day exercises, postponed yesterday morning for the same reason, will be held this morning following the graduating exercises.

MR. RAYMOND FRECHE DEAD.

The body of Mr. Raymond Freche was brought here from Houston yesterday for burial. Mr. Freche died at St. Joseph's infirmary of Houston, in which city he has lived for some time. He was a brother of the late Mrs. Zelia Bonneville of this city, and made his home in Bryan many years. He was advanced in years and was a native of New Orleans.

ALLEN ACADEMY COMMENCEMENT.

Public exercises will be held at the opera house tonight with music, and the annual literary address by Hon. Leon Sonfield of Beaumont.

The graduating exercise will be held at the opera house tomorrow (Thursday) night at 8:30 o'clock.

SCIENCE AND INVENTION.

AN OPTICAL ILLUSION.

Experiment to Show That Relief Effect May Be Obtained With One Eye.

In a stereoscopic view two photographs, taken from two points not very far distant from one another, give the effect of relief when viewed through the instrument. It is commonly believed that this fact proves the necessity of binocular vision to obtain a relief effect. The following experiment shows that the same perception can be had with the use of one eye only and with a flat drawing, if the eye is deceived by some artifice which it is not educated to recognize as such.

Take a piece of pasteboard, and with a pin make a hole in it. Bring the pinhole quite close to the eye, and through it look at the accompanying figure. The figure should be in full light, and at a distance from the pinhole not over one inch. Under ordinary circumstances, every line would be blurred with the figure so uncomfortably near the eye; but the

The Illusionary Diagram.

pinhole acts as a diaphragm, which decreases several of the defects of a short-focus lens, and the figure will remain distinct—not only distinct, but also changed in appearance. The central white disk will seem to bulge out of the black field as if it were a convex hemisphere. The perception of relief in that case is immediate, and as strong as it could be obtained with the stereoscope.

The illusion is partly the result of the abnormal curvature of the focal surface, the crystalline lens of the eye acting as a very short-focus lens in such a case. The lines drawn on the white disk and on the black field help to deceive the eye. Their crowding together near the edges of the disk causes them to resemble great circles drawn upon a sphere. Moreover, the eye is not free from distortion. If a few parallel lines running close together are looked at through a pinhole at a very small distance, they appear as if they were bent inward on the margin of the image. On the white disk the lines have been curved the way distortion would bend straight lines if they were brought close to the eye. On the black field white lines have been drawn so as to appear nearly straight in spite of the barrel-shaped distortion, which is the result of the position of the diaphragm before the eye when the crystalline lens assumes its greater convexity. The fact that the lines on the disk seem to be strongly distorted, while those on the field do not, probably causes the eye to underestimate the distance of the disk and to overestimate that of the field.

At any rate the illusion is much less striking if the lines be omitted. And, continues Scientific American, if it be made with a black disk on a white field, every other feature of the experiment remaining unchanged, it again becomes evident that the effect of relief is not so easily perceived. Irradiation, which causes a luminous object to appear larger and nearer than a dark one, has a share in the production of the illusion.

Secrets of Roman Builders.

Have we solved Rome's secret? It has been for years a hidden secret from builders how the Roman masons hundreds and thousands of years ago managed to make mortar which practically defied the ravages of time. In the ruins of our old castles, churches, etc., one frequently will see an overhanging arch, the other side of which has been battered down perhaps by cannon balls years ago. This fragment seems to defy the laws of gravitation owing to the excellent binding of the mortar. It now is stated that the Hungarian chemist Brunn has discovered the secret of this and has compounded a liquid chemical which renders certain kinds of matter proof against the effects of wind and weather. Prof. Brunn says that it doubles the density of nearly every kind of one and renders it waterproof. It imparts to all metals qualities which defy rust and oxygen.

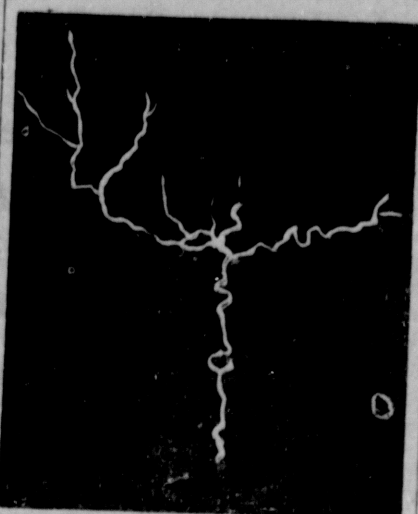

Nitrogen for Tires.

One of the reasons why pneumatic tires gradually become exhausted, when unpunctured, is that the compressed air within slowly escapes through the rubber, and this process hastened by the oxidation of the fiber, which causes it to crack. As least a partial remedy for this, it has been proposed to inflate tires not with ordinary air, but with nitrogen, an inert gas which does not affect rubber. Tests of nitrogen-inflated tires for automobiles have been made, and the results are said to be encouraging.

FROM THE GROUND UP.

Photography Has Caught the Direction of Lightning's Flash.

The application of instantaneous photography to lightning flashes has rendered it possible to say in what direction a flash moves. There are almost always ramifications, resembling the rootlets of a plant, from the main discharge, and these ramifications occur in the direction toward which the discharge takes place. Thus lightning

What the Photo Showed.

photographs reveal the actual occurrence of the relatively rare phenomenon of a discharge passing from the earth to the clouds. A number of such photographs, says Youths' Companion, have been collected by Prof. William J. S. Lockyer, and one of them is here reproduced.

NATURAL MUSEUM.

Rare Animals of Australia and Effort to Preserve Them.

The Linnean society of New South Wales has recently called for the enactment of a law to protect, under severe penalties, the rare animals of Australia from impending destruction. As the world knows, Australia is the only remaining home of various and curious types of animal life which have vanished from other parts of the

Australian Duckbill.

globe. Thus the Australians themselves recognize that their country is a kind of museum of natural history, and some of them, at least, desire that it shall remain so. The destruction of the rare forms of animal life is due not only to hunters, but also to the unfavorable conditions created by the growth of agricultural interests. It will probably be necessary, remarks Youths' Companion, to form reservations, within which the animals may be preserved amid a suitable environment.

FOR LAZY FOLKS.

Push Button Made to Operate the Morris Chair.

The latest ease producer is a Morris chair which tilts backward or forward

No Exertion to Operate.

ward as much or little as desired without getting up to set the rod. In fact there is no rod, but instead a series of stops controlled by a push button. You simply touch the button, says Popular Mechanics, and the weight of the body carries the back to any angle wanted; sit up straight and touch the button again and the chair straightens up at the same instant.

Wellman After the Pole.

Walter Wellman is preparing to set out on his second airship expedition in search of the north pole. During the winter he has had his airship reconstructed at Paris. It has been fitted with new motors, and its lifting capacity has been increased to 19,500 pounds. The airship will be shipped via Tromsø, Norway, to Spitzbergen, where it will arrive about June 1. It will be put together and tested there, and if the tests are satisfactory, the flight to the pole will be made early in August.

Boiler Explosions.

Comparing boiler explosions in England and the United States, Consul Halstead stated that during the 12 months ending June 30, 1905, there were 14 persons killed and 40 injured from British steam plant accidents; in the United States 383 persons killed and 585 injured. The number of steam boilers in the United States does not exceed by more than 50 per cent. those in Great Britain, so that, in comparison, the actual percentage is ten times as great in the United States as in England.

THE GROWING OF PEDIGREE STRAWBERRIES

Simply a Matter of Selection and Propagation of Best Plants—By T. B. Hoyt, Prominent Minnesota Horticulturist.

In speaking of "pedigree" strawberry plants, I mean high grade plants that have been selected for a series of years with the view of improvement. A pedigree plant is one with a known ancestry. Webster's definition of pedigree is: 1. Lineage; line of ancestors from which a person or tribe descends. 2. An account or register of a line of ancestors. A pedigree plant is not understood to be the same as a pedigree animal, although many of the laws and principles of breeding are practically

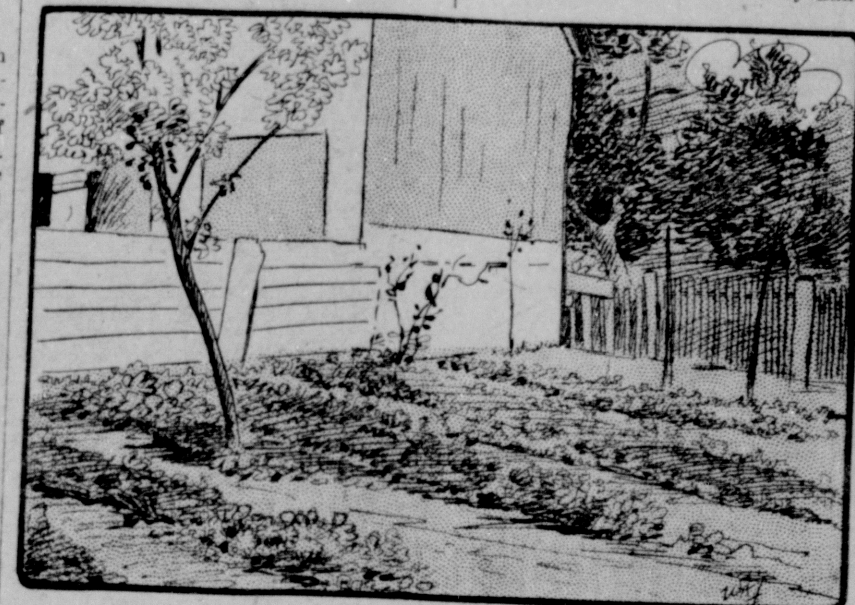

Parent Strawberry and Young Plant.

the same with plants as with animals. The term pedigree is used simply as a means of distinguishing high grade plants of a known selection from plants of ordinary breeding. I believe it is as important for the plant propagator to keep a record of his plants for propagating purposes as it is for the stock breeder to keep a record of his breeding stock.

My aim has been from the first to improve the best varieties of strawberries adapted to the Northwest by a continual selection of ideal plants each year. I have set a new propa-

gating bed every spring and my plants for this work have always been selected with the greatest care, never using an exhausted plant from a fruiting bed, but always plants selected from the propagating beds set the previous year.

A Backyard Strawberry Patch.

gating bed every spring and my plants for this work have always been selected with the greatest care, never using an exhausted plant from a fruiting bed, but always plants selected from the propagating beds set the previous year.

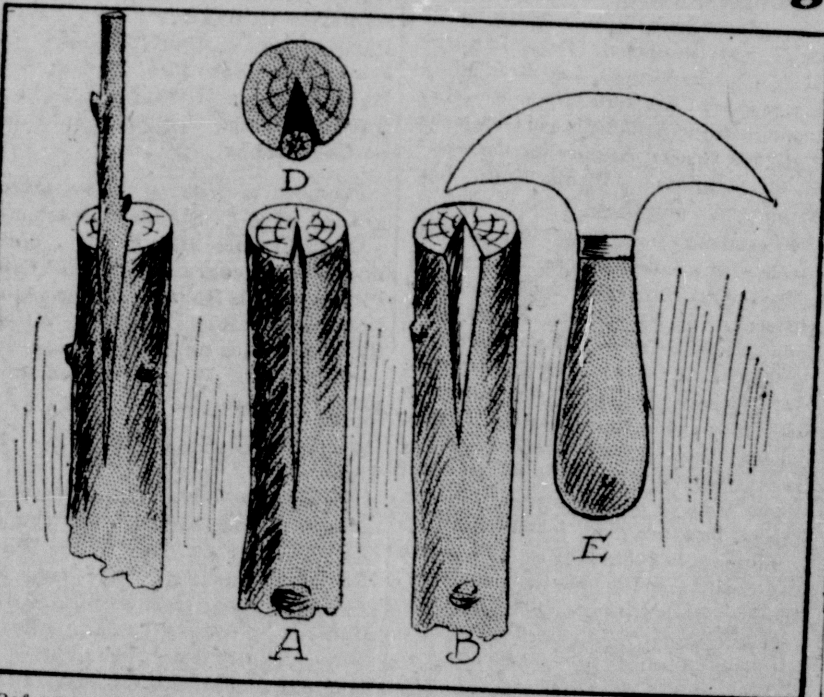

Only the ideal specimens, the same as ideal ears of corn, are selected for our breeding plot, and we find that the improvement is usually in proportion to the standard of the plants used for that purpose.

Variation in plants is continually going on. No two plants are exactly alike, and when planted in good soil and given the best cultivation some are going to outdo the others, and these should be selected. These individual variations are of the greatest importance to the plant breeder, and by selecting these properly, a distinct strain may often be produced. New varieties are not often produced in

filling up the rows as evenly as possible and still not getting the plants too close. The quicker a young runner takes root the quicker there will be another new one. Plants must be kept growing and not allowed to crowd one another if the best development is expected. It is a good plan to clip the last runners that appear late in the fall to allow those already set to have all the strength and become better plants.

As soon as the ground freezes in the fall we start covering our propagating beds. We do this to prevent the alternate freezing and thawing which often damages plants. We have tried all kinds of covering, but this year used coarse marsh hay almost exclusively. While strawberry plants may often winter through without covering, we have found that it pays to put on a covering each year, even at a large expense.

A New Method of Grafting

Before a meeting of the American Pomological society the following method of grafting was described by a gentleman from Colorado, who stated that it was the most successful method that he had employed in top working old orchards, and that it could be used on branches as large as four inches in diameter with great success. It impresses one as being possibly better than ordinary cleft grafting for large stocks, from the fact that the surfaces of the union were all smooth and the scions held more firmly. The method of procedure is as follows: After determining where the graft had better go the stock is cut off with a fine saw and the cut made in the side of the stock, as shown at "A." This is then cleaned out with a knife, as shown at "B,"

a saddler's knife is used for this purpose, outline of which is shown at "E." The scion is cut as is usual in cleft grafting and is driven with some little force into the groove of the stock as shown at "C" and in cross section at "D." It will be found that after this graft has been driven in it can only be pulled out by using considerable force and it is held much more firmly than in the ordinary cleft graft.

All wounds should be covered with wax as in ordinary cleft grafting.

For Scaly Legs.—Coal oil and lard are excellent for scaly legs caused by parasites. A scaly-legged fowl is a detriment to any flock, and this is the time of the year when they are apt to be overlooked.

HAVE A QUARTER OF A BILLION.

Six Widows Own Interests Aggregating That Many Dollars.

With another woman, Mrs. William Henry Smith, in the ranks of wealthy widows—widows whose wealth is reckoned by tens of millions—it has become true that six of them alone by massing their fortunes could make a total of \$250,000,000. Mrs. Smith's fortune will not fall far short of \$70,000,000. It is an amount almost as large as that which Russell Sage left to his widow. Mrs. Smith is not as well known throughout the union as Mrs. Sage.

Her widowhood is too recent, as it was only a short time ago that her husband died in Japan, for the glamour of her fortune to surround her name instead of the man's, as already has happened in Mrs. Sage's case. But her wealth will change that quickly, for it places her among the four richest widows in the country. The six who by drawing checks could make up a quarter billion are Mrs. Sage, Mrs. Smith, Hetty Green, Mrs. Anne Weightman Walker, Mrs. Marshall Field and Mrs. Marshall Field, Jr.

Each of these first four women has a fortune several times as great as that of either Mrs. Field. In fact, it is possible Mrs. Sage, Mrs. Smith, Mrs. Walker and Mrs. Green could make such a showing without the aid of the Chicago widow.

Hetty Green's fortune is estimated at from \$60,000,000 to \$80,000,000. Leaving her out of the count, the list is headed by Mrs. Sage and Mrs. Smith jointly, for, though the widow of Wall street's great money lender received \$85,000,000 under his will, she has given away \$15,000,000.

Next comes Mrs. Walker with \$60,000,000. Mrs. Field the elder has \$15,000,000. Mrs. Field the younger \$5,000,000. But the comparative smallness of young Mrs. Field's fortune is offset in a sense by the fact that her sons when of age will divide \$50,000,000. Mrs. Green and Mrs. Walker are the business women of the six and each inherited her fortune from her father.

In Mrs. Walker's case, however, the fortune came from William Weightman practically as it stands to-day, whereas Mrs. Green received only \$12,000,000 from her father's estate, and at least quadrupled that amount through her own ability. Mrs. Sage and the elder Mrs. Field are the only widows of the six whose fortunes were amassed by their husbands.

Where Amber Is Found.

Santo Domingo is one of the few places in the world where amber occurs in any quantity. The bulk of the supply comes from the vicinity of Konigsberg, on the Baltic sea. There it occurs in the lower oligocene, and appears to have deposited originally in glauconitic beds of clay, which was afterward eroded by wave action and the amber distributed, though much of it is taken from beds in which it was originally deposited. Amber is simply fossilized resin, derived apparently from certain coniferous trees. The conditions under which it occurs in Santo Domingo do not appear to differ substantially from the Baltic sea coast. It is found near Santiago City, associated with lignite, sandstone and conglomerates. These beds probably belong to the oligocene formation and are found containing amber at a number of places on the north coast, as well as on both flanks of the Monte Cristi range. It also frequently occurs in the streams flowing through these beds. The amber is usually found in ovate lumps, from the size of a pea to a man's fist, often flattened, dull on the exterior, being covered with a kind of brownish crust.—Maxwell's Talsman.

Mental Photography.

A member of the Philadelphia Photographic society has been trying the new mental photography which has been making some stir in Berlin. This experimenter took a blank photographic plate into his dark room, bound it to his forehead, and for 20 minutes concentrated his thoughts on the face of a close friend of his.

The developed plate, which he says is the identical one that he bound to his forehead, shows, faintly, traces of a face that has many points of resemblance to that of his friend. Such at least is the opinion of some who have seen the plate, though others declare that its markings are indeterminate and look like nothing in particular. The point raised by the experiment is whether or not an image on the human brain can be photographed, since the X-ray can secure an image of the arteries of a body or of something enclosed in a solid, opaque covering.

Couldn't Disturb Ike.

"I want a pound of oyster crackers," said Mrs. Medders. "Sorry, ma'am," replied the country grocer, "but I reckon I'll have to send 'em later. Ike Huskey is asleepin' on top o' the barl' they're in, an' he's in a bad humor to-day."

His Attention Elsewhere.

"Do you think your name will be handed down in history?" "I can't discuss that," answered Senator Sorghum. "I'm too busy keeping it from being passed up by the legislature."—Washington Star.

Very Contrary.

"Theatrical managers are very consistent kinds of men." "Why so?" "Because they growl if their lights are dark and grumble if the light."

Just Like a Woman

By H. F. GETHEN.

(Copyright, by Joseph B. Bowles.)

"The rail from Bayonne was not then laid, but the drive by diligence was sufficiently enjoyable. My aunt (Lady Jane) and I reached St. Jean Pied de Port late one evening, and that little town seemed wrapped in slumber. On the following morning—I am going to take you over the Pyrenees into Spain," asserted my aunt. "Really and truly?" I remember exclaiming.

"Yes; I know all about it; we've only to get to Bourgette, and then it's quite easy," she said confidently.

A carriage was secured, the morning was lovely, and the French frontier was soon passed, for we had very little luggage, and nothing on which to pay duty. A few miles further, at a lonely kind of an inn, the coachman insisted on our paying his fee. Having no choice, we consented, and then entered into the lonely little inn in search of breakfast. After eating with good appetites some well-cooked food, we discovered that the carriage had been replaced by a couple of rough ponies, with even rougher attendants of the boy tribe. The road beyond was considered too steep for vehicles, so we mounted in silence.

"Please, our bags," pleaded I, feeling disturbed by our landlady's smiling detention of our light luggage.

"He says they must be sent on by the mule train," exclaimed Lady Jane.

The straps of her pony's saddle broke before we had gone a mile and had to be mended with a fragment of string, and a good deal of "language," which we fortunately could not comprehend, was leveled at the four-legged members of the party. Then our little cavalcade proceeded onward and upward, passing by many wayside crosses, and encountering wild-looking harmless peasants with trains of mules, and then again we noticed more of the rough crosses.

"What in the world makes the people put up so many wooden crosses?" asked Lady Jane at last, looking rather nervous. You must know that, although she was our own aunt, we generally called her Lady Jane. She was very kind, but rather odd.

The boy managed to make us understand that the crosses were erected to mark spots where murders had been committed, but of course, we didn't know if this was true.

Higher and higher we wound, zig-zagging through the glorious forest, and steeper and steeper grew the road. The boys walked on silent and sullen, and the sun began to quite scorch our skins. Suddenly the ponies stopped at the summit of the mountain, and the boys pointed to some far distant buildings. Without a word they lifted us from our saddles, demanded the promised fees, which Lady Jane at once gave, and set forth on their return journey before we had gathered courage to protest. The houses were there certainly, across a wide plain, and it was a weary walk.

At last we arrived at the village, which appeared to possess but one street. We were courteously welcomed by the innkeeper. A Spanish dinner was shortly served, and we were glad to retire to rest soon afterwards.

"I wish we were safe at home," ejaculated Lady Jane. "There is no bolt to the door," she cried, when we found ourselves in a bedroom containing two beds. So she insisted on piling the somewhat scanty furniture against the door, "in case anyone should try to rob us," she said, fearfully. The heavy bedsteads were immovable, but the other things made a formidable barricade. Worn and feverish from the unusual heat, we soon got into our beds.

"I've put the water jug ready to throw at any intruder," said Lady Jane, who appeared brave now she was under the bedclothes, "and I've hidden my purse in the toe of my shoe."

At last we both slept, and the last sound we heard was the wind wailing round the thick stone walls.

A knock at the door disturbed but failed to arouse us. Then, to the accompaniment of a muttered exclamation, the latch was lifted softly and the door pushed gently. With an awful clatter the barricade gave way and out of the darkness ejaculations loud and deep reached our ears.

"I've got the jug," said my aunt, and feeling no doubt that her courage equaled that of Nelson at least, she sprang up and, in the dark, cast her pitcher in the direction of the voice.

Oh, what a crash there was! Then hurried footsteps came along the passage, and a lantern showed the innkeeper fully dressed and his wife in a wondrous deshabille. The wail couple, scolding as usual.

turn, soon resup'ns Night Cure—a topical tere chair, a restorative remedy, while Dr. Shoop's is wholly an internal treatment. A restorative reaches throughout the system, seeking the repair of all nerve, blood and tissue.

It's Cure, as its name implies, does its

table you sleep. It soothes sore and inflamed

wages, while the Restorative, eases nervous

dement, gives renewed vigor and ambition,

dis up wasted tissues, bringing about renewed

length, vigor, and energy. Take Dr. Shoop's

Restorative—Tablets or Liquid—a general tonic

to the system. For positive local help, use as well

E. J. FOUNTAIN

THE QUALITY GROCER

THE MORNING EAGLE

Entered at the Postoffice in Bryan, Texas as second-class matter.

BY CARNES & WALLACE

BRYAN, TEXAS, MAY 29, 1907

One of the most beautiful of love stories ended on earth to be continued in heaven with the death of Mrs. William McKinley.

This is one year that is going to try the farming ability of the farmer. The man who makes a good crop this year in Texas should have an honorary degree from every agricultural college in the country.

The suggestion has been made that the governor should issue a proclamation setting aside one day as "Sparrow Day" in Texas and let the whole population turn out and exterminate those little feathered vagabonds, the English sparrows. If they do any good we have never heard of it; and on the other hand they infest every nook and cranny of eaves and gutters, fill the house with mites and be-foul the water, especially where cisterns are used. They are no doubt in many instances a source of sickness among the people and should be fought with the persistence with which the people of Texas fight green bugs and boll weevils.

Dr. O. M. Ball, plant disease expert at the Agricultural and Mechanical College, recently returned from a trip to several points on the Gulf coast, where he went to investigate certain diseases that are injuring the truck crops in that section. The trouble is caused by a worm that attacks the roots of tomatoes and some other truck crops and by a rust that attacks the tops of tomatoes and peppers. The worm produces galls on the roots of the tomato plant, and, as a result of the ravages of the worm and the rust, the tomato crop has been almost entirely ruined in the

sections infested. The egg plant is not injured by either disease, however, and a large crop is being harvested and marketed. The rust does not seem to attack the melons of various kind.

PUBLIC SCHOOL PROMOTIONS.

The following promotion list has been handed to the Eagle for publication by Supt. T. S. Minter of the Bryan Public Schools:

EAST SIDE.

Promotion List First Grade.—May Bur-tis, Teacher.

Girls—Fay Driver, Belle Gainer, Regina Hart, Rosa Hart, Cecil Hickman, Mildred Newton, Annie Scrimshire, Stella Seigle, Lillian Sutton, Helen South, Zenobia Webb, Lillian Wilcox.

Boys—Laurence Castles, Mason Cooper, Guy Deaton, Milton Darwin, Edwin Griffin, Marcos Griffin, Sam Harrison, Roger Powers, Hadley Pletzer, Horace Smith, James Wymola.

From Second to Third Grade.—Annie Dearing, Teacher.

Girls—Ethel Evans, Rosilee Evans, Gladys Franklin, Francis Hall, Marguerite Houston, Lillie Griffin, Myrtle McCullough, Francis Mike, Frankie Reed, Susie Sanders, Nina Scardino, Annette Seigle, Mildred Wells.

Boys—Leslie Ballard, Jim Bennett, Charlie Cole, Jesse Conroy, Edgar Darden, Eddie Dobrovolsky, Charles Gainer, Alexander Harris, Mal Hall, Quincy Henry, Milton Higgs, Douglas Howell, Farrar Johnson, Robert Kohde, John Tabor, Dewey Weaver, Willie P. Withers, Robert English.

Promotions from Third to Fourth Grade.—Emily Thomas, Teacher.

Boys—William Davis, (Second rank in grade), Henry Harrison, Charlie Leigh, Marius Zinanti, Noah Dansby, (conditioned in Geography) Frank Shramek, (conditioned in Geography).

Girls—Lucy Harrison, (highest rank in grade).

Promotions from Third to Fourth Grade.—Mrs. Minnie Estill, Teacher.

Boys—Bill McMichael, Dudley South, Frank Betts, Elbert Gammon, Carl Wiprecht, Tom Jenkins, Lewis McCullough, Whit Brogdon, Kemper McHaney.

Girls—Elsie Martin, Johnnie Mae Gray, Willie Bell Johnson, Richie Newland, Ruby South, Annie Minter, Sybil Johnson, Sarah Lizzie Powers, Marion Miller, Leila Brockman, Rebecca Kelley, Pearl Edge, Bettie Vermirovsky (conditioned on arithmetic), Albina Dobrovolsky, Helen Edge. Florine Batte is recommended for promotion. Bill McMichael has been neither absent nor tardy during the entire term.

Promotions from fourth to fifth grade.—Emily Thomas, Teacher.

Boys—Errol Marriott, Albertine Wil-

cox, Willie Leigh (conditioned in Arithmetic and Spelling), Albina Wymola (conditioned in Language and Spelling).

Girls—Corene Franklin, (highest rank in grade), Katie Daly, (second rank in grade), Bessie Abercrombie, (conditioned in Spelling and Arithmetic), Lillie Bar-on, (conditioned in Arithmetic), Irene Pletzer, (conditioned in Geography), Annie Poweas, (conditioned in Geography), Elizabeth Roseborough, (conditioned in Language and Geography).

Promotions from Fourth to Fifth Grade.—Winnie Thomas, Teacher.

Boys—Anthony Aranda, Guy Bittle, Elmer Bullock, Walton Cole, Earl Driver, Conn Gibbs, Algie Hearn, Oren McCullough, H. C. McMichael, Pat Newton, Roland Nunn, George Pletzer, Tom Powers, John B. Scrimshire, Edgeworth Webb, George Wicker, Read Wiprecht.

Girls—Lila Adams, Fannie Allen, Annie Belle Batte, Marjorie Bittle, Ruth Boatwright, Albert Conway, Lucile Dod-son, Ray Grace, Ursula Gray, Adelle Grice, Myrtle James, Della Lawrence, Minnie Nitch, Virginia Lee Reed, Lillie Fae Sanders, Clara Seale, Naomie Kelley, (conditioned in Arithmetic and Geography).

Highest General Average for the year—H. C. McMichael, Walton Cole, Read Wiprecht, Conn Gibbs.

Promotions from the Fifth to Sixth Grade.—Lelia Suber, Teacher.

Boys—Otis Brogdon, (conditioned in History), T. P. Boyett, Floyd Betts, John Seeley Caldwell, (conditioned in Arithmetic), Ransom Cole, Richard Conroy, Milton Dodson, (conditioned in Geography and History), Harold Deaton, Eugene Driver, Earl Graham, Antone Hajek, Douglas Houston, John Hanway, Wesley Kelley, Sewel Lawson, Gholson Rhodes, Peter Scardino, Johnnie Scardino, (conditioned in Geography and Grammar), Joe Spell, (conditioned in Geography, Grammar and History), John Shramek, Robbie Walthall.

Highest Average for the year—Earl Graham; second, John Hanway and Ransom Cole.

Girls—Francis Bennett, (conditioned in History, Geography and Arithmetic), Louise Caldwell, (conditioned in History), Beatrice Grace, Ethel Gilbert, (conditioned in History), Mary James, Lillian Locke, (conditioned in Geography, Arithmetic and History), Alda Lewis, (conditioned in History), Robbie Powers, Ora Powers, Maggie Sutton, Ruby White, Emma Vesmirovsky, (conditioned in Geography, History and Arithmetic), Alline Weaver, (conditioned in Geography, History and Arithmetic), Lurline Weaver, (conditioned in History).

Promotion List from Sixth to Seventh Grade.—Ada Board, Teacher.

Boys—Wilson Betts, Elmer Brockman, Ross Brogdon, Marshall Bullock, Davis Cole (rank first 94), Guy Dansby, Tom Evans, Philip Groginski, Carroll Harris,

Edwin Jenkins, Henry Johnson, Ollie Parks, George Powers, Irl Sanders, Sebastian Wilson, T. D. Wilson, Neill Zuber. Conditioned—Burt McMorries, arithmetic; Welty McCullough, geography, U. S. history, arithmetic.

Girls—Lillian Batte, Nora Henry, Lur-line Houston, Claire Newland, Allie Newman, Robbie Nicol, Mary Roseborough, Evelyn Sanders, Bennie Searcy, Deci Weddington (rank first 98), Clare Well Ida Wiprecht.

Conditioned—Pansy Conlee, geography, U. S. history; Abbie Martin, U. S. history.

Seventh to Eighth Grade, in order of standing.

Will Howell, Albert Kinnard, Ira Maude Camp, Ruth Taylor, Louise Batte, (conditioned in arithmetic), Edgar Buchanan, Harry Estill, Edith Sutton, Mary Shelburne, Stella Johnson, Ruby Sutton, Madeline Hanway, Naneene Hall, (conditioned in arithmetic), Bess Bizzelle, (conditioned in history and arithmetic), Fannie Hamilton, (conditioned in history and grammar), Lessie Mawhinney, (conditioned in arithmetic), Fanny May Miller, (conditioned in history and grammar), Robert Ford, (conditioned in grammar), Spencer Ford, (conditioned in grammar), Albert Rhodes, (conditioned in arithmetic and grammar.)

Promotions from Eighth to Ninth Grade.—Wesa Weddington, Teacher.

Boys—Robert Ford, Willie Gelber.

Girls—Emma Dobrovolsky, Ludmilla Hajek, Laura James, Agnes Kinnard, Annie Searcy, Margaret Zuber.

Promotions from Ninth to Tenth Grade.—

Boys—Fred Ford, John Newton, Willie Tucker, Eddie Vesmirovsky.

Girls—Edith Cavitt, Esther Cavitt, Lucy Christian, Clara Mawhinney, (conditioned in Latin), Hattie Searcy, Stella Stuart, Pauline Webb, Inez Killough, Rowena Rhodes, (conditioned in Latin).

WEST SIDE.

Heart Strength

Heart strength, or Heart Weakness, means the strength, or Nerve Weakness, nothing more. It is not one weak heart in a hundred, it is, actually, diseased. It is almost always hidden, tiny little nerve that really is all as to this obscure nerve—the Cardiac, or Heart Nerve—simply needs, and must have, more power, stability, more controlling, more governing strength. Without that the heart must continue to fall, and the stomach and kidneys also these same controlling nerves.

This clearly explains why, as a medicine, Shoop's Restorative has in the past done so much for weak and ailing hearts. Dr. Shoop first of all the cause of all this painful, perplexing, and popular prescription—is alone directed to the weak and wasting nerve centers. It builds, strengthens, it offers real, genuine heart strength, strength these nerves—restores them as needed, with

KOPPE FERRY BRIDGE ASSURED

Commissioners' Court Will Meet Thursday, June 6, to Let the Contact Money in Bank.

The third free iron bridge across the Brazos river between Brazos and Burleson counties is now assured. Koppe and Robinson and citizens of Bryan have complied with the terms of agreement with the commissioners' court by placing the loan of \$10,000 cash in bank subject to the order of the court, which will supply the remainder of the funds necessary to build the bridge. The court will meet Thursday, June 6, to let the contract for the bridge. As heretofore stated, the loan of the \$10,000 to the county is for six years without interest. One half of the amount, \$5,000, is supplied by Koppe and Robinson and the other half by citizens of Bryan.

Jno. M. Lawrence looked after the work of soliciting the subscriptions to the fund raised in this city, and was highly successful in the performance of this important duty.

SPECIAL A. AND M. EXAMINATIONS.

College Station, Tex., May 27.—Acting President Puryear of the Agricultural and Mechanical College announces that arrangements have been completed for holding special examinations for entrance to the college. The examinations will be held on June 14 in the high school buildings in Houston, San Antonio, Dallas and Palestine, under the supervision of the superintendents of schools to whom application should be made. The object of the local examinations is to save prospective students the expense of a trip to College Station in September in case they are not prepared to pass the examinations. Failure on the present examination, however, will not prevent a student from taking a second examination here at the opening of the session in September.

Proposals.

Sealed bids to supply the A. and M. College with 1800 cords of good merchantable wood, for the session of 1907-1908, will be received at the rooms of the Board in the Mess-hall until 10 o'clock a. m., Wednesday, June 12th. One thousand cords to be delivered before January 1st, 1908. The wood to be subject to the approval of the President as to quality and measurement.

Bids for pork and beef will also be received at the same time. Grass fed beef from September 15, 1907 to January 1, 1908; and corn fed beef to be furnished from January 1st to the close of the session. Beef or pork, to be furnished on requisition of the steward, and subject to the approval as to quality by the President. A certified check for \$300 must accompany each bid, both for wood and meat. A bond of sufficient amount will be required of the successful bidder to compel faithful compliance with the contract. The right to reject any or all bids is reserved.

H. H. Harrington, President.

Protect Your Winter Clothes.

Get a bottle of Collier's Moth Exterminator and sprinkle in your trunks as you pack your clothes, blankets and quilts away for the summer. This will insure them against the moths. Sold by Smith Drug Co.

8:00 p. m., lecture.....Capt. H. H. Sargent
Subject, "The Limitation of Armaments and Arbitration"

AN INTERESTING OPEN LETTER.

Bryan, Texas, May 26, 1907.
Mrs. Furniture Purchaser,
Bryan, Texas.

Dear Madam:
We wish to tell you that we have five cars of Furniture bought, to be shipped about June 15. These cars contain some of the choicest and most beautiful furniture that money, artistic taste and skill can buy.

Our Mr. Wells, who is in charge of the Furniture department, arrived recently, and wishes to say that should you desire any particular styles or designs of goods in this line, or if you have rooms that you would like to furnish to order, he will be glad to have you call at our store or 'phone No. 48 and let him know your wishes. He will be glad to call at your home with catalogues in order that you may select exactly what you want. This opportunity will be open until June 10, after which date it will be too late to include special orders in our opening shipments and get the benefit of our low freight rate on the large shipment.

Remember it is our pleasure to talk with you and explain our goods whether you buy or not.

Yours to please,
Buchanan-Moore Co.

Protect Your Carpets and Rugs.

The moths are destroying your carpets. Collier's Moth Exterminator will destroy them with three minutes work. Sold under a strict guarantee by Smith Drug Co.

Ribbons. Ribbons.

Just received 200 pieces plain and fancy Ribbons. Wilson & Derden.

Weak Women

To weak and ailing women, there is at least one way to help. But with that way, two treatments must be combined. One is local, one is constitutional, but both are important, both essential. Dr. Shoop's Night Cure is the Local. The former—Dr. Shoop's Night Cure—is a topical mucous membrane suppository remedy, while Dr. Shoop's Restorative is wholly an internal treatment. The Restorative reaches throughout the entire system, seeking the repair of all nerve, all tissue, and all blood ailments. The "Night Cure," as its name implies, does its work while you sleep. It soothes sore and inflamed mucous surfaces, heals local weaknesses and discharges, while the Restorative, eases nervous excitement, gives renewed vigor and ambition, builds up wasted tissues, bringing about renewed strength, vigor, and energy. Take Dr. Shoop's Restorative—Tablets or Liquid—as a general tonic to the system. For positive local help, use as well

Dr. Shoop's Night Cure

SIGNAL OF BRYAN

BABIES FED TO SNAKE.

Revolt Story That Is Sent From New Mexico.

FANATICISM IS FRIGHTFUL

Tribe of Indians, Who Worship Enormous Serpent, Keep Reptile Housed and Appease His Appetite by Giving Monster Their Infants.

El Paso, May 28.—In spite of the fact that a similar charge was investigated and dismissed by a grand jury some time ago, another complaint has been filed with United States District Attorney Llewellyn of New Mexico, that a tribe of Indians in that territory are given to the worship of an enormous serpent, to which is fed the new born babies of a pueblo in which it is housed and carefully tended and guarded. The complaint was filed by a Catholic priest, who alleges that a dozen of the families were segregated from several pueblos two years ago formed into a pueblo by themselves. Although it is known that many children have been born to these families, not a child is to be found in the pueblo. This led the priest to press his investigations, with the result that he discovered that in an adobe house, isolated and closely guarded, there is an enormous serpent, which is worshiped by the Indians of all the pueblos around, and that every babe born in the small pueblo, and, it is suspected in many others, is fed to the serpent. Major Llewellyn, having no jurisdiction, has filed the affidavit of the priest and other evidence with the territorial authorities.

WOMAN'S AWFUL DEEDS.

Kills Her Mother, Shoots at Father and Burns Herself to Death.

Chicago, May 28.—Miss Philaner Swinnen, thirty years old, believed to be demented, shot and killed her mother, attempted to kill her father, and then set fire to her garments and was burned to death early Tuesday. The woman was released from the Dunning asylum a year ago. Her father, Joseph Swinnen, a laborer, escaped by running out of the door. A love affair is said to have been responsible for the young woman's aberration. Her mother and father were in bed asleep when the girl arose and found her father's revolver. She fired two shots at her mother, both of which took effect and instantly killed her. As Swinnen jumped from his bed the girl fired two shots at him. He was afraid to go near her and ran from the house to summon assistance. When he returned with a policeman and several persons they found the young woman lying upon the floor, her clothing ablaze.

AMERICANS DEFEATED.

Champion Golfer of the United States Loses Out in Second Round.

St. Andrew's, Scotland, May 28.—The American champion, Eben Byers of Pittsburgh, was defeated in the second round of the amateur golf championship, J. Patterson of Edinburgh winning by 3 up and 2 to play. Scoville, American, subsequently suffered defeat at the hands of A. W. Murray of the Purley Downs club 4 to 2 to play, so the only American remaining in the championship contest is C. F. Norstman of the Chevy Chase Golf club, Washington. The weather is bright and sunny, with little wind. A. E. Williams of the Northwood club defeated H. L. Gore, the American, by one hole.

DECIDED DROP.

Bonfires Kept Burning to Prevent Damage to the Young Fruit.

Cleveland, O., May 28.—The temperature dropped to forty degrees above zero Monday night. This record has been equalled only twice before since the weather bureau was established in 1871. Throughout the fruit belt along the south shore of Lake Erie huge bonfires are kept burning to prevent damage to the young fruit. From other points in the state reports indicate much destruction.

FROST IN KENTUCKY.

Coldest Weather Ever Experienced During the Month of May.

Lexington, May 28.—Heavy frost fell all over eastern and central Kentucky Monday night. It is feared it killed all fruit and early vegetables. This is the coldest weather ever known in this section at this season of the year.

TWO TOWNS ATTACKED.

Uprising in China Is Attributed to the Excessive Taxation.

Swatow, May 28.—Revelationists are now attacking Chung Lang and Tung Chang, wealthy towns in the Chang Hai district. Many inhabitants have fled to this city. The uprising is attributed to excessive taxation.

Trials to Go On.

Sandy Hook, Ky., May 28.—The trials of Judge James and Elbert Harris, John Smith, John Abner and Bill Britton, charged with the assassination of Dr. B. D. Cox, will be tried by a special judge, who had not been announced up to noon Tuesday.

Washita Bank Full.

Denison, May 28.—Washita river is bank full.

Six Inches of Rain.

Iowa Park, Tex., May 28.—Six inches of rain fell here.

JUGULAR VEIN SEVERED!

Awful Result of a Controversy About Horse.

Jacksboro, Tex., May 28.—Jim Paschall, nineteen years of age, was stabbed to death. The wound was in the neck. The jugular vein was severed and the blade of the large pocket-knife with which he was cut broke off in the wound.

Sid McDowell, aged seventeen, who lives in the same locality as Paschall near town, was at once placed under arrest and taken to jail. The affair was witnessed by several persons. Paschall was a young married man and leaves a widow, mother and some sisters.

Just before the tragedy the young men emerged from the court house, where they were parties to a lawsuit over a horse trade.

PUT HANDS ON LADY.

Latter Gave Alarm and Fled and Boarder Captures Culprit.

Marlin, Tex., May 28.—Mrs. H. C. Wells was awakened by hands being placed on her. Springing from bed, she discovered a negro in her room. Mr. and Mrs. Wells conduct the Commercial hotel and the husband had gone to meet a passenger train. The lady escaped from the room and reached the sleeping apartment of Mr. Caton, a boarder, who responded to her aid and found the negro on the back porch of the hotel, whom he restrained until Mr. Wells could arrive from the depot. The negro was lodged in jail and a complaint has been filed against him. The negro had been employed about the hotel for the last several months. He is about twenty-five years old and gives his name as Ed Dorman.

ACQUITTAL ORDERED.

Man Had Pressed Unwelcome Attention and Stabbed by Woman.

El Paso, May 28.—Holding that the state had not established the fact that a fork was a deadly weapon, and that in the opinion of the court the killing had been justifiable, Judge Harper, in the Twenty-fourth district court instructed the jury in the case of Maria Reyes, a Mexican woman, charged with murder, to return a verdict of not guilty. It was alleged that the woman had killed Amador Ronquillo, because he had pressed unwelcome attentions upon her. By her own statement the Reyes woman said she had stabbed Ronquillo with a common take fork, inflicting instant death.

ARBALA STRUCK.

Boy and Girl Killed and Scantling Blown Through a Mule.

Sulphur Springs, Tex., May 28.—Near Arbala, twelve miles southeast, the residence of Mr. Kirk was blown to pieces. His little daughter was so badly hurt that she will die. T. E. Binton's house was demolished. Ed-die Davis' home was torn to pieces and his fourteen-year-old brother killed. A scantling was blown through a mule of T. E. Benton and another mule was blown away and has not since been seen. Bill Pickett and Ed. Steen both had their dwellings converted into kindling wood.

Big Prices For Tomatoes.

Jacksonville, Tex., May 28.—Two cars of tomatoes, each containing 918 crates, sold at auction on the track here Monday. J. L. Keach of Indianapolis bought the first car put up for \$1.87 1-2 per crate. The other was sold to the Iron City Produce company of Pittsburg for \$1.77 1-2. A third car is being loaded, on which there is an offer of \$1.75 per crate.

Large Sum Voted.

Detroit, May 28.—The Switchmen's Union of North America voted \$200,000 to the defense fund of Moyer, Haywood and Pettibone.

Elgin Butter Output.

Elgin, Ill., May 28.—Butter output past week was 671,700 pounds.

BREVITIES BUNCHED.

Tulsa, I. T., has street cars. International cotton conference is in session at Vienna. Danube river dams burst, causing 250 houses to collapse. General M. Serrano was elected vice-president of Guatemala. Gus Betner, a tailor, was found dead in a stable at Oklahoma City. Trinity and Brazos Valley railway will soon have twenty locomotives. Harvie Jordan addressed at Vienna the international cotton conference.

To Stop Piles Try This.

Piles get instant relief, when Dr. Shoop's Magic Ointment is applied. It's a Pile Cure, remember, and it is good for nothing else whatever except piles. General Ointments, for many uses, can't possibly cure piles. A pile ointment must be specific. Every aim of its maker must be directed specifically toward piles alone. Says Dr. Shoop, "I make three valuable ointments, and yet, one only—Dr. Shoop's Magic Ointment—will bring help to pile sufferers." Even then, in old chronic cases, originating because of a torpid liver, with biliousness, I prescribe my Dr. Shoop's Restorative internally while using Magic Ointment locally or externally. Keep in mind this fact, please, that the large blood vessels of the liver originate in the walls of the rectum, where piles arise. Obstruct these vessels in the liver and piles instantly appear. Dr. Shoop's Restorative corrects stomach and liver sluggishness, hence its value as an aid to Magic Ointment in the treatment of obstinate cases of piles. None genuine without Dr. Shoop's name on the package. Sold at 50 cents by M. H. JAMES.

NO. 65170

Sired by Alamo Jubilee and out of Fadett Signal Queen. Test 16 lb. 2 oz.
Grandam Fadett Signal. Test 20 lb
Great dam Croter Marie. Test 26 lb.

This bull, Signal of Bryan, is without any doubt as fine an individual as you can find in the Jersey cattle strain, and his pedigree is without a missing link as to test cows from his mother back to the imported cow from the Island of Jersey. One year ago I offered \$25.00 to \$35.00 for his heifer from 3 to 5 months old. Today they are selling from \$25.00 to \$75.00, and hard to buy at any reasonable price. This bull will make the season at my barn in Bryan, Texas.

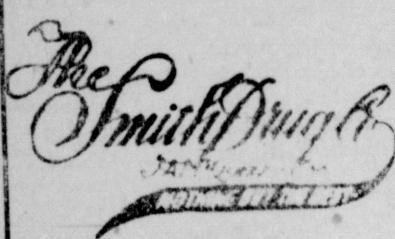

Charges for his Services will be Five Dollars

payable at time of service with return privileges. I can prove to you that it is to your advantage to breed to this bull, as he can not be used at this price another year. For information see

J. M. CALDWELL.

Try This For Catarrh.

Free tests are now being supplied by mail to all Catarrh sufferers. There is no expense—no obligation whatever. Dr. Shoop is combining Oil of Eucalyptus, Thymol, Menthol, Oil of Wintergreen, etc., and is incorporating these ingredients into a pure, snow-white cream-like Imported Petrolatum. This Cream—Dr. Shoop's Catarrh Remedy—gives immediate and lasting relief to catarrh of the nose and throat. That all may first test it free, these trial boxes are being mailed without charge, simply to encourage these tests and thus fully demonstrate, beyond doubt, the value of this combination.

If Catarrh has extended down to the stomach or bowels, then Dr. Shoop's Restorative must also be used internally if a complete cure is to be expected. Otherwise the Dr. Shoop's Catarrh Remedy will alone be entirely sufficient. Write Dr. Shoop, Racine, Wis. for sample and book. Sold by Druggists everywhere.
